

The LEADSmart smartphone application is a new Lead Alliance initiative that provides Mount Isa community members with fingertip access to useful information for limiting exposure to lead.

LEADSmart is the next step in the Lead Alliance's mission to achieve sustainable improvements in the health of the Mount Isa community through education, so we can work together towards a safer and healthier community.

Matt Bowen

LEADSmart app ambassador

LEADSmart app now available

The Lead Alliance has created a LEADSmart App to enable families to track and monitor lead levels and give you information on living safely with lead.

Where can I download the app?

Use your smartphone, iPad or tablet to navigate to the Apple App Store, then search for LEADSmart.

Or use Google Play to search for LEADSmart.

You can also find it under the 'health and fitness' category.

What does the app do?

The app allows you to:

- Create a profile for you and each member of your family
- Record and track blood lead level test results over time
- Know the facts about 'living smart' and limiting your lead exposure
- Receive reminders for your next recommended test date
- Send appointment information to your personal smartphone calendar
- Receive notifications about Lead Alliance programs, events and news
- Share the app on Facebook

What if I don't have a smartphone or tablet?

You can access the information using a computer by visiting the Lead Alliance website www.leadalliance.com.au

You can call the Lead Alliance hotline on 1800 457 547 if you're concerned about your lead levels.
